Subject: Re: updated set of comments on BDCP Toxins Appendix D-- QUANTITATIVE MODEL

Erin, I'm leaving work soon to pick up glasses (much needed) at Kaiser. However, I'll take this along look this over later today.

RE the quantitative assessment model-- I believe that this must be what Theresa is referring to (will confirm):
http://www.swrcb.ca.gov/rwqcb2/water_issues/programs/TMDLs/northsfbay selenium/TM-6_Modeling_Final_Report_02-10.pdf

The first full bullet on p. xx discusses the San Joaquin flows/loading issue that I was referring to earlier. I admit to have scanted some of the tech docs for the NB TMDL but intend to read this doc (selectively) before Tuesday.

Subject: updated set of comments on BDCP Toxins Appendix D

Hi All,

This draft comment document reflects discussions, emails, and comments from USGS & EPA. Have not yet spoken with Chris Foe but plan to hopefully Tuesday. I am out on Monday. I don't have anything in the sections for endocrine disruptors and other urban contaminants.

Karen, when is the last possible time to get these comments to you?
